PRODUCT CHARACTERISTICS CARACTÉRISTIQUES DU PRODUIT

DESIGN:	Now offered in two formats, this soft, colorful and sound absorbing large format downlight pendant is composed of twelve felt-like acoustic panels surrounding a custom LED light source distributing a uniform and direct light.
INSTALLATION:	Easy to install, adjust single power cable mounting with clip-on acoustic panels.
LIGHT SOURCE:	Mute features a custom LED light engine supplied with a standard dimming driver (0-10V or phase).
STRUCTURE:	Precision cut chrome top cover plate and white or chrome canopy.
SHADE:	The custom CNC cut panels are made from recycled PET bottles and are recyclable. Available in silver grey, charcoal or red.
CERTIFIED:	c-CSA-us

NOISE REDUCTION
The Mute is composed of 12 sound absorbing panels surrounding a custom design light engine. Panels are available in 3 color: Charcoal, Silver or Red.

4258-16

SUSPENSION
1 single suspension cable on the smaller version, 3 easy-to-adjust aircraft cables on the larger version for extra support and stability

INTEGRATED ELECTRONIC DRIVER
For fast access and maintenance

REFLECTOR
For increased light uniformity and output

BOTTOM LENS
Frosted acrylic lens for superior light transmission. Easy installation & locks with acoustic panels

HIGH PERFORMANCE LED BOARD
Custom made LED module

RECYCLED PANELS
Custom CNC cut polyester panels made from recycled bottles (PET). Panels are recyclable

DESCRIPTION

The next generation of lighting is here with the architecturally inspired Divide™ series powered by WaveStream™ LED. The broad offering of efficient LED products include a complete family of recessed, linear suspended, surface, and wall mounted luminaires. The Divide's modern, ultra-shallow design is complemented with functionally engineered features for practical use. High performing Accu-Aim™ optics allow for maximum energy savings while achieving desired light levels. Available in 4', 8' and continuous run lengths, the Corelite Divide Suspended Series is ideal for open offices, private offices, retail, healthcare and educational facilities.

SPECIFICATION FEATURES

Construction

Nominal 2-1/4" x 12" housing constructed from extruded aluminum and die-formed 20 gauge cold rolled steel. Side panel assembly measures just 3/4" tall.

End Caps

Precision engineered 2-piece die cast aluminum alloy end caps attach mechanically to the end of the fixture without exposed fasteners visible from below the fixture. End cap adds 2-1/8" at each end.

Light Engine

LED's are available in 3000K, 3500K or 4000K with CRI options of either ≥80CRI or ≥90CRI. Lumen output will be affected - please refer to the lumen adjustment factor table.

Electrical

Long-Life LED system coupled with integral electronic drivers to deliver optimal performance. Standard with 120-277V 0-10V dimming drivers (1% standard). 347V 0-10V drivers are available. Dimming wires come standard but can be capped in the field for standard switched operation. A single power feed drop supplied as standard.

Controls

Options compatible with Cooper Lighting Solutions Connected Lighting Systems:

- WaveLinx sensor
- LumaWatt Pro sensor
- Fifth Light DALI driver

Refer to the Connected Lighting options page and ordering information for more details.

Mounting

Aircraft cable mounts on 4'-0" and 8'-0" centers. Fixture is balanced to allow for minimal leveling and simple installation. All sections are continuously wired with push-in connectors for fast installation. Fixtures can be joined for straight continuous runs using patented Quick-Tab alignment features. Refer to installation instructions for various ceiling interface details.

Finish

Electrostatically applied polyester powder coat paint in white, silver, or black. RAL custom colors are available.

LH and L5 driver options not available in 20L lumen package.	SW sensor must be used with "STD" driver. LWI sensor must be used with "SR" sensor ready driver. Integrated Sensors combined with Emergency Circuit require one UL924 Bypass Relay per emergency section.		Refer to photometric IES file data for top cover performance.		White mounting hardware standard; for black mounting hardware, add "-B" after ceiling type.	Standard row configurations over 8' consist of 4' and 8' luminaires.	

Lengths

Available in 4-ft and 8-ft sections. All sections are modular eliminating the need for starter, joiner and end sections. Standard row configurations over 8-ft consist of 4-ft and 8-ft luminaires unless otherwise specified.

Optics

Optical grade acrylic embedded with patented Accu-Aim™ micro-optics for optimal distribution, low glare, and high performance. Specular (WS) or diffuse (WD) optical patterns are available to achieve the right look for any application. See page 3 photometric data for optical performance.

Top Cover Options

Dust Cover (DC) option is a clear formed polycarbonate for worry free cleaning and protection. Frosted Cover (FC) option is a frosted formed polycarbonate for worry free cleaning, reduced uplight, and protection. Solid Cover (SC) option is a high reflectance white powder coat painted steel reflector for 100% downlight.

Lumen Maintenance

Projected lumen maintenance based on TM-21 standards is L87 > 60,000 hours at 25°C ambient conditions.

Emergency Options

Optional 120V-277V integral emergency battery pack is 14W maximum, 90 minute output, and powers a 4-foot section. Test switch/indicator button located on the top side of the luminaire. Patented EZ Key prevents accidental discharge of the battery during construction. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 14 = 1400 lumens). The combination of integrated sensor and emergency circuit options require an EPC UL924 bypass relay that disables sensor control of emergency sections when normal power is lost.

Integrated Sensing and Control Systems

Integrated options must be used in conjunction with the associated system and may not be compatible

with other options or accessories. Please consult WaveLinx and LumaWatt Pro system pages for additional details and compatibility. Consult Marketplace Options - Lutron system pages for additional details and compatibility. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com.

Weight

6.0 lbs per foot.

Compliance

Modules are UL recognized components and indoor luminaires are cULus listed for 25°C ambient environments, damp location listed, and RoHS compliant. LED modules comply with IESNA LM-79 and LM-80 standards. DesignLights Consortium™ Qualified and classified for DLC Standard and DLC Premium, refer to www.designlights.org for details.

Warranty

Five year warranty.

FIXTURE LENGTHS

SENSOR OPTIONS

Integrated sensors are located in the endcap of 4' units and in the middle of 8' units for individual and continuous runs. Each unit is individually controllable and can be grouped together using a wireless control system.

QUICK-TAB ALIGNMENT

Corelite's patented quick-tab alignment system creates a seamless and simple installation every time. Simply align the tabs into the corresponding slots. The fixture can then hang freely while a single contractor makes the final connections; it all slides back together and is securely fastened in place.

FEATURES:

- ✓ Architectural sound absorbing Eco Felt Acoustic panel.
- ✓ Made from recyclable plastic material available in different thicknesses.
- ✓ Class1 Fire rated with 0.7 Noise Reduction Coefficient/1" Acoustic.
- ✓ Light source: COB LED.
- ✓ High efficiency integral reflector combined with opal lens insert provide excellent lighting distribution.
- ✓ Circular internal louver is available in a wide range of finishes.
- ✓ Aluminum body of the luminaire comes with built-in-driver.
- ✓ LED Spot is rated for 60,000hrs. L70 with +85 CRI.
- ✓ Has a proven record in office, commercial and retail installations.
- ✓ Custom modifications are available.
- ✓ ED luminaires are certified to CSA and UL Standards. **reinventlight**

Slice through the sound for a more productive workplace with the Luxxbox Blade acoustic pendant. Available with or without striking LED illumination, Blade reduces up to 80% of reverberated noise in an open space for increased comfort and concentration. Available in more than 12 mesmerising colors, Blade can be customised to suit any interior space.

KEY BENEFITS

- Highly effective sound absorption
- Available in 4 lengths, 4 heights and a wide range of colors
- High performance dimmable LED light source
- Height adjustable 9' / 3m suspension cables
- 9' / 3m length of black woven power cable per fixture
- Acoustic panels are 100% recyclable and manufactured from 65% recycled material
- Casambi bluetooth available
- POE available on request
- IES photometric files available
- Custom sizes and additional color options available on request
- Bluetooth controller available upon request

CCT	3000, 3500, 4000 K

MEDIUM (3.8' / 1180mm long)	
Delivered Lumen Output	1006 lm (265lm/ft - 852lm/m)
Wattage	24 W (6.3W/ft - 20.4W/m)
Efficacy	42 lm/W Source
CRI	90
CCT	3000, 3500, 4000 K

LARGE (5.8' / 1770mm long)	
Delivered Lumen Output	1531 lm (264lm/ft - 865lm/m)
Wattage	37 W (6.4W/ft - 21W/m)
Efficacy	41 lm/W Source
CRI	90
CCT	3000, 3500, 4000 K

EXTRA LARGE (7.7' / 2360mm long)	
Delivered Lumen Output	2100 lm (273lm/ft - 890lm/m)
Wattage	42 W (6.5W/ft - 21.2W/m)
Efficacy	50 lm/W Source
CRI	90
CCT	3000, 3500, 4000 K

PET ACOUSTIC PROPERTIES

Products are given a Noise Reduction Coefficient (NRC) from 0 to 1 based on their ability to absorb sound, where 1.0 equals 100% sound absorption. The NRC is used to calculate Sabin value of any surface material. The Sabin value equals the NRC multiplied by the total surface area in squared feet or squared metres.

EXAMPLE: SUSPENSION - POWER

On the 'Detail A' diagram you can see the power cord will always exit the pendant through a hole located 20mm away from the suspension cable.

At the moment we don't supply canopies with suspension points, so our recommended method of installation is shown on the diagram on the right.

You will find more detailed information about the canopy on page 3 of this document or on the Installation Instructions document on our website.

DESCRIPTION

The SkyRidge™ transforms ambient lighting by perfectly blending a refined modern styling with our breakthrough WaveStream™ LED technology to deliver exceptional performance and superior energy savings. SkyRidge's advanced engineered LED system with superior optical design delivers an unparalleled combination of optimal light uniformity and exceptional efficiency for greater energy savings.

SkyRidge is compatible with all of today's popular ceiling systems and available in a variety of configurations for application versatility. Its perfect balance of form and function make it an ideal choice for commercial office spaces, schools, hospitals, retail and other indoor ambient applications.

SPECIFICATION FEATURES

Construction

Shallow 4.75" deep housing is extruded aluminum frame and injected molded composite end plates. End plates are securely attached with screws for strength and rigidity and the elimination of gaps. End plates have accessory grid-lock feature for safety and convenience. Four auxiliary fixture end suspension points are provided. Large access plate for supply connection.

Controls

Metalux LED luminaires come standard with 0-10V dimming drivers (1% standard).

Options compatible with Eaton's Connected Lighting Systems:

- WaveLinx sensor
- LumaWatt Pro sensor
- SVPD sensor
- DLVP sensor and driver
- Fifth Light DALI driver

Other options include step-dimming and 3rd party drivers. Refer to the Connected Lighting options page and ordering information for more details.

Electrical

Long-life LED system coupled with

electrical driver to deliver optimal performance. LED's available in 3000K, 3500K, 4000K or 5000K with a minimum CRI of 80. Projected life is 100,000 hours at 92% lumen output. Electronic drivers are available for 120-277V applications.

Emergency Battery Pack Option

Optional 120V-277V integral emergency battery pack is available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. Emergency/generator transfer options available – see ordering information for details.

Driver Access

Drivers can be accessed via plenum.

Finish

Durable frame has high reflectance baked matte white enamel finish for luminous uniformity.

Optics

Precision formed optical assembly with positively retained high optical grade acrylic lens provides a directed optical distribution using WaveStream LED technology.

SkyTrim Accessory

Designed for an array of interior applications, SkyTrim is a luminous decorative accent that can be mounted directly on the light guide of a SkyRidge fixture either at the factory or in the field. It is ideal for spaces where color is necessary to provide visual cues, emphasize brand identity, directional awareness or simply as an artistic expression.

Compliance

Components are UL recognized. Indoor luminaires are cULus listed for 25° C ambient environments, RoHS compliant, and comply with IESNA LM-79. LEDs comply with LM-80 standards. DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details.

Warranty

Five year warranty.

NOTES: ⁽¹⁾Products also available in non-US voltages and frequencies for international markets. ⁽²⁾With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. ⁽³⁾Chicago rated version does not allow for row mounting. ⁽⁴⁾Air version is vented but does not meet air handling requirements. Air version is non-IC. Air version is not available with integrated sensor. ⁽⁵⁾DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details. ⁽⁶⁾Fixtures using factory installed SkyTrim option are not DLC qualified. ⁽⁷⁾2900 and 3400 lumen packages are not available with Step-Dim driver. ⁽⁸⁾2900 and 3400 lumen packages are not available with 5LTD-Dali option driver. ⁽⁹⁾5LTHD option uses two drivers at 6400 lumens. ⁽¹⁰⁾Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). GTR2 and ETR2 options include 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. Must specify voltage as 120V or 277V when ordering these devices.

Integrated Sensing and Control System Options

NOTES: Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: ^(A)Consult WaveLinX system pages for additional details and compatibility. ^(B)Consult LumaWatt Pro system pages for additional details and compatibility. ^(C)Consult DLVP system pages for additional details and compatibility. ^(D)Consult SVPD series system pages for additional details and compatibility. ^(E)Consult Fifth Light system pages for additional details and compatibility. ^(F)Consult Marketplace Options - Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com.

Flexible Metal Conduit Options

Flex options available for 0-10V dimming control, DALI dimming control, emergency and night light functions. 72-inch factory-installed and pre-wired to driver, fitted to luminaire housing access plate with 90° enclosed FMC connector. Not all options may be combined and installation ratings vary by type.

A3/8-4/18GDIM series notes: Factory installed dimming option 3/8" flexible metal conduit with 2-#18 power and ground wires and 2-#18 UL-listed jacketed 0-10V +/- control wires. Meets UL 66, 83, 1479, 1569, 1581, 2556. NEC® 250.118, 300.22(C), 392, 396, 330, 501, 502, 503, 530, 504, 505, 518, 520, 530, 645, 72; Federal Specification A-A-59544 (formerly J-C-30B); all applicable OSHA and HUD Requirements. UL Classified 1-, 2-, and 3-hour through penetration with applicable fire stop product (not included). May be surface mounted, fished and/or embedded in plaster. Cable tray and approved raceway rated, install per NEC®; Environmental Air-Handling Space Installation per NEC® 300.22(C).

Specifications & dimensions subject to change without notice. Consult your Eaton Representative for availability and ordering information.

INTEGRATED SENSOR

The SkyRidge with Integrated Sensor technology provides automatic energy savings without sacrificing performance. Traditionally, these types of energy savings required coordination between the luminaire and a lighting control system. The SkyRidge delivers superior lighting with integrated occupancy and daylighting controls.

Capture the benefits of traditional lighting controls, without complicated coverage planning or special wiring. Ideal for new construction or retrofit, the SkyRidge delivers automatic ON to an energy saving light level, while ensuring lighting is turned OFF when the space is unoccupied.

The integral daylight sensor reduces the need for special daylight zone planning. Each luminaire will automatically adjust the light level based on reflected light beneath the sensor in a closed loop method.

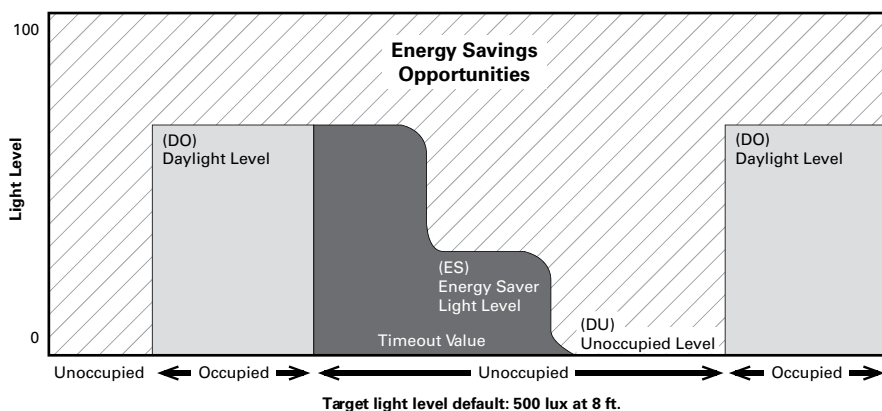

Occupied daylight light levels and unoccupied light levels can be adjusted using the integrated sensor programming remote (Catalog Number: ISHH-01). The integrated sensor personal remote (Catalog Number: ISHH-02) provides code compliant manual raise, lower, ON, OFF control.

The SkyRidge with Integrated Sensor is easy to install with no special wiring and ensures energy savings out-of-the-box with default control settings.

How it works:

- As the user enters the space controlled by the integral sensor, the lighting turns ON to the default daylight level.
- Lighting will remain at that the daylight level until the space is unoccupied. This will start the occupancy timeout period (default 20 minutes).
- If the space remains unoccupied for half of the timeout period, the lighting will automatically reduce to the Energy Saver light level. This adjustable light level is typically half of the occupied daylight level.
- At the end of the timeout period the lighting will go to the unoccupied light level. This adjustable light level uses the OFF default setting.

Optional Remote Controls

ISHH-01 Programming Remote

ISHH-02 Personal Control Remote

Description: Narrow linear pendant LED lighting system with sound absorbing polyester shroud having .45.90 NRC rating, grey matte finish.

Construction: The housing is extruded aluminum with electrostatically applied textured white powder coat paint. **Driver:** Standard constant current electronic driver with 0-10V dimming input; dimming range from 100% down to 1%. Universal (UNV) voltage is from 120 - 277V, 50/60 Hz. **Direct Light Shielding:** Extruded frosted or satin white acrylic snap-in lens with DR. Consult factory for uplight shielding. **LED Module:** Distributed LED array in a variety of lumen output packages. LED color is available in (L30) 3000K, (L35) 3500K or (L40) 4000K. Module is replaceable. L90 ≥ 100,000 hours. **Mounting:** Aircraft cable suspended, individual mount or continuous runs. Labels: ETL listed, conforms to UL Standard 1598 / 8750 and CSA Standard C22.2, Damp location. **Warranty:** 5-year limited warranty on LED and Driver.
